ZIGG CONDOS
Construction Newsletter #4
February 2, 2016

Prepared by SCP Developments Limited

EXCAVATION BEGINS

This month the excavation will commence. A large machine called an excavator will be used to dig up soil that dump trucks will remove off site.
This work will take about 2 ½ months before getting to the bottom of the hole at which point the excavation of the foundations will start and the crane will be erected.

DID YOU KNOW

During the Zigg Condos excavation, 22,000 cubic meters of soil will be excavated.
This amount of soil would fill 9 Olympic size swimming pools or 135,000 bathtubs,

Fun Fact

During the construction of the Panama Canal a whopping 270,000,000 cubic meters of earth was moved. This is the equivalent to 12,272 Zigg Condos!!

CITY UTILITY WORKS

Over the next few months, the City of Toronto and Toronto Hydro will be conducting work along St Clair Ave West, in front of the Zigg site.

This work is outside the control and realm of the Zigg Construction Team and as such we are not aware of the schedule of this work and apologize on behalf of everyone for any inconvenience.
