Pouring Concrete In The Winter

The main challenge when doing concrete work in the winter is the low temperature. This will hinder the ability for the concrete to cure. As such we have to take measures to assist and prevent the concrete from freezing. This involves using propane heaters that stay on overnight to keep the slabs warm.

Concrete Pour Schedule

We are currently at the 5th floor, and we forecast concrete completion to be done early March, (weather pending). You can expect to see 2 pours a week, however the schedule may change due to various environmental causes.

If there are any other concerns or question, please do not hesitate to contact us.

Construction Schedule

December 23

Closed for the holidays

January 3 2017

Work resumes

February 28 2017

Anticipated Formwork Completion (weather pending)

December 2017

Building Completion

Construction Work Hours

Typical construction work hours are as follows:

M-F : 7am to 7pm
Sat : 9am to 7pm
Sun/Holidays: No Work
